MUEHLBAUER GROUP AT A GLANCE

The Muehlbauer Group is a German high-tech company that is known worldwide for its innovative solutions in the field of automated production. With over 40 years of experience, Muehlbauer develops customized technologies for the future of industry and everyday life. The company is the secret driving force behind many developments that make our modern lives safe and efficient.

Around 4,000 employees at over 30 locations worldwide ensure that Muehlbauer's visions become reality around the globe. Sustainability, quality and unwavering trust in partnerships are the pillars on which our company has built its success story. Muehlbauer is not just a service provider, but a creative problem solver that shapes the future every day with innovative ideas and technological excellence.

MPS

PRECISION PARTS & SURFACE ENGINEERING

Since its foundation in 1981 in Roding, Bavaria, Muehlbauer has stood for maximum precision. The Muehlbauer Parts & Systems business unit consists of the company's own precision parts production with a state-of-the-art electroplating facility. All components for machines and other products are manufactured here in-house – individually and, if necessary, overnight! Our MPS makes us extremely agile and independent.

AUTOMATION

PRODUCTION EQUIPMENT & SYSTEMS

Our AUTOMATION division goes far beyond the assembly of customized production systems! We provide intelligent software solutions for the automation of different production steps and drive Industry 4.0 forward. We are passionate about serving 90 % of the global RFID market with our high-speed bonders, and have achieved market leadership in the semiconductor industry with our unique die sorting technology.

MB ATECH

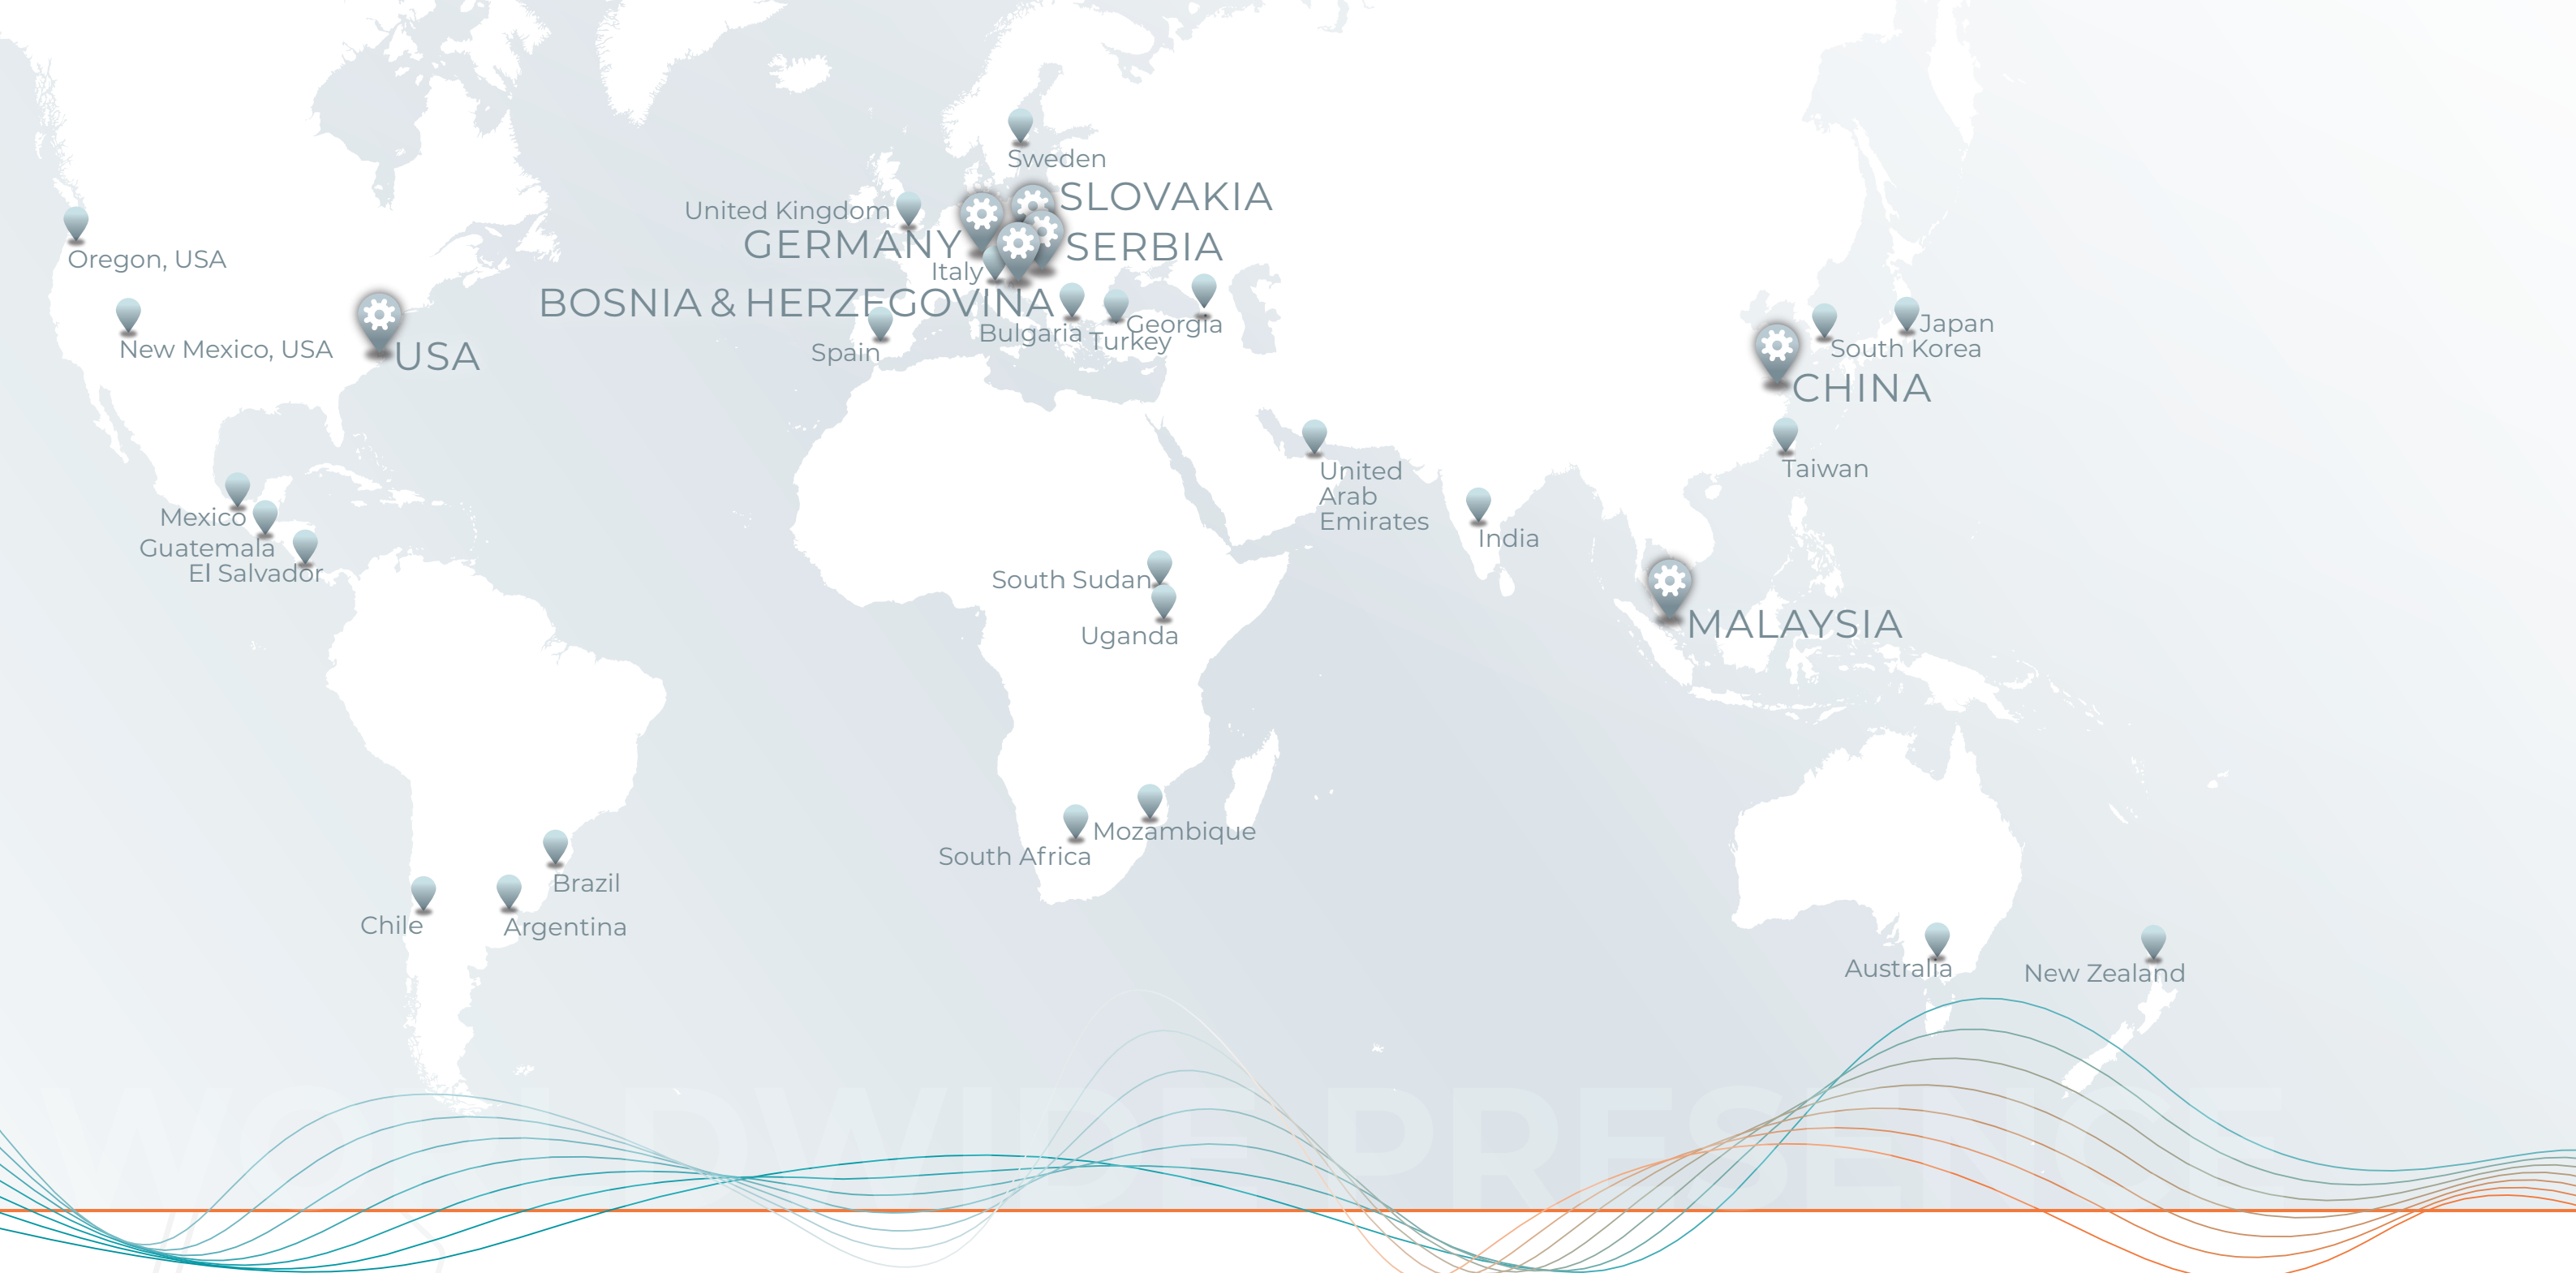

BATTERY & FUEL CELL TECHNOLOGIES

Our newest and currently most dynamic division ATECH – Advanced Energy Technologies – brings unique machine requirements to series production. In the field of eMobility, we offer highly efficient production lines for the manufacture of pouch cells and prismatic cells for lithium-ion batteries, as well as MEAs & stacks for fuel cells. Our newly built ATECH Giga Center with dry room provides optimal conditions for gigascale manufacturing.

TECURITY®

GOVERNMENT & TECHNOLOGY SOLUTIONS

Our TECURITY® division is the leading specialist when it comes to implementing innovative security systems for identifying and verifying documents and people. For example, we manufacture systems for the production of chip cards, IDs and passports or supply electronic gates and self-registration kiosks, along with the associated software, for airports and border crossings. With more than 30 years of experience and over 300 successfully implemented ID projects worldwide, we provide our customers with unmatched expertise and trust.

MUEHLBAUER

PRODUCTION, TECHNOLOGY & SERVICE LOCATIONS

Muehlbauer operates a global network of production, technology and service locations, ensuring close customer proximity, fast response times and consistent support across all regions.

PERFORMANCE

MB GetID

A SECURE, COMPLIANT AND MODULAR IDENTITY PLATFORM FOR ENROLLMENT, APPLICATION PROCESSING AND DOCUMENT ISSUANCE.

GetID is a modular identity platform spanning the complete enrollment workflow – from device connectivity to application processing and document issuance. It collects, verifies and manages personal, biometric and supporting document data across offices, field missions and self-service kiosks, hosted by Mühlbauer or deployed on your own infrastructure.

1

DEVICE CONTROLLER

Device integration layer for biometric and document acquisition, including reader and barcode scanner functionality.

2

BIOMETRIC DATA ACQUISITION

Adds an operator-facing interface for guided acquisition, device control and quality feedback.

3

COMPLETE APPLICATION LIFECYCLE

Adds the full enrollment workflow: applicant data, biometrics, documents, approval, payment and issuance.

ENROLLMENT WORKFLOW

FROM APPLICANT DATA
TO TRUSTED DOCUMENT
ISSUANCE

BENEFITS

LOWER REJECTION RATES

Biometric quality checks and validation rules help prevent incomplete or non-compliant applications.

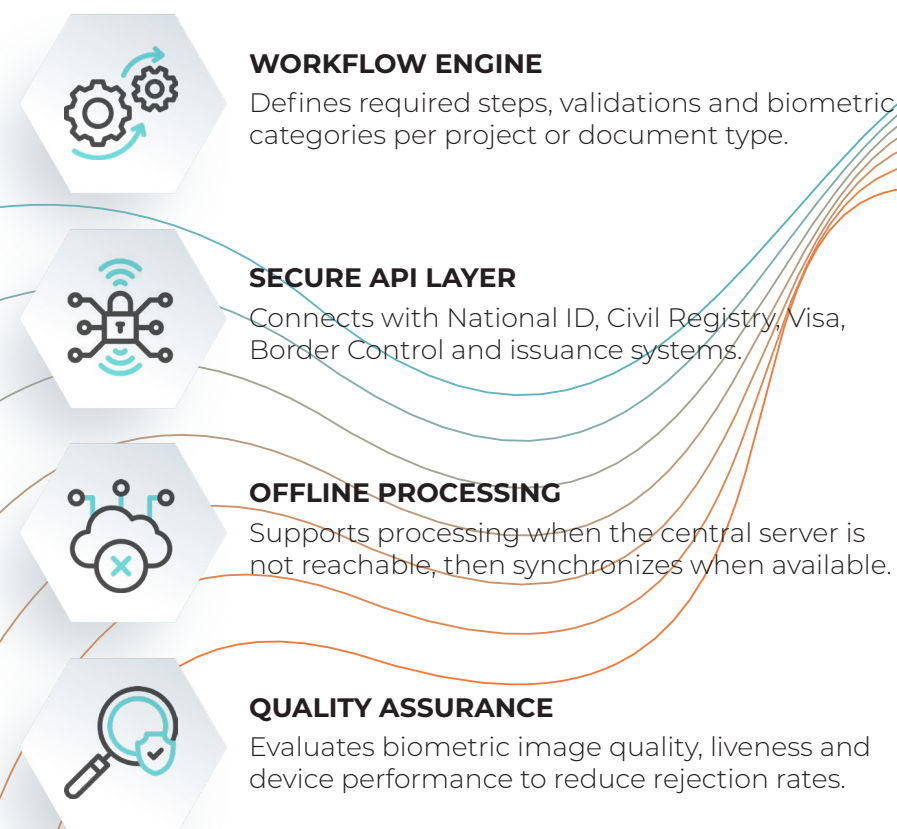

FASTER SERVICE DELIVERY

Guided steps and integrated quality controls reduce rework and support a smoother journey.

MANAGEMENT VISIBILITY

Dashboards, audit trails and reporting give administrators clear, reliable operational oversight.

CORE SOFTWARE CAPABILITIES

END-TO-END PROCESS VIEW

A guided, auditable workflow connects applicant data, biometrics, documents, approval and issuance in one controlled process, built around the ICAO 9303 and ISO/IEC 39794 standards.

WORKFLOW

TRUST LAYER

SECURITY, COMPLIANCE AND CONTROL

GetID is designed not only to acquire data, but to protect it, prove every action, and give administrators full operational visibility across every enrollment location.

GetID can be hosted on secure cloud platforms or deployed within your own infrastructure for maximum data sovereignty, with secure API connections to registries, visa and border control systems.

SECURITY & DATA PROTECTION

End-to-end encryption, secure data storage and role-based access control protect sensitive applicant data.

STANDARDS-BASED BIOMETRICS

Face, fingerprint, iris and signature acquisition follow international ICAO and ISO/IEC biometric standards.

ADMINISTRATION & AUDITABILITY

Every enrollment event, update and approval is logged, monitored and reported for full accountability.

24/7 BACKUP & RECOVERY

Continuous backup processes safeguard enrollment data and ensure uninterrupted availability at all times.

WHERE THE SOLUTION CAN RUN

DEPLOYMENT OPTIONS FOR EVERY SCENARIO

GetID can be packaged around your operational scenario – fixed offices, portable enrollment missions, citizen-operated kiosks or mobile field work. Exact peripheral models and device bundles are selected per project, country requirements and certification scope.

EVERYWHERE

DESKTOP ENROLLMENT STATION

Fixed, high-throughput administrative offices, equipped with a workstation, camera, fingerprint scanner and document reader.

PORTABLE FIELD KIT

Remote areas, mobile missions and temporary enrollment points, packed into a compact, rugged, battery-powered case.

SELF-SERVICE KIOSK

Citizen-guided enrollment with lower operator workload, using an integrated UI for automated acquisition guidance.

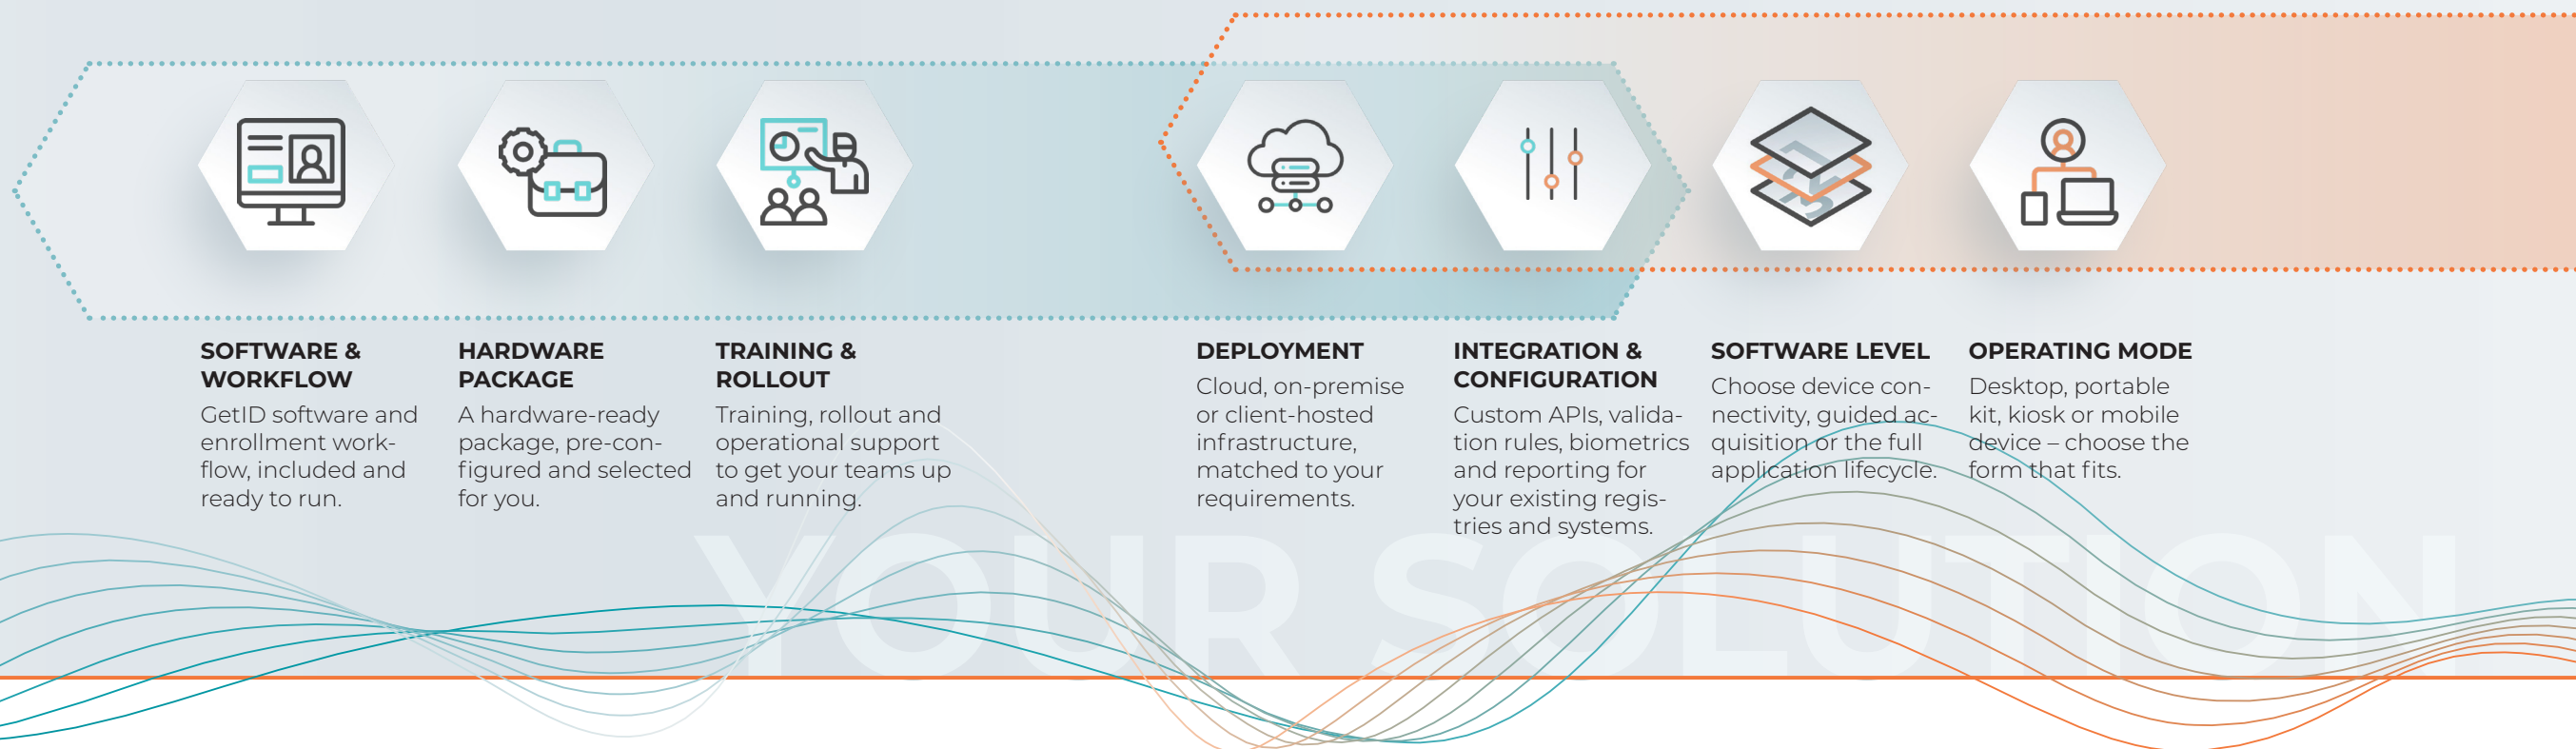

MOBILE DEVICE

Flexible, tablet-based enrollment for on-the-go identity acquisition, ideal for assisted field work.

TURNKEY OR TAILORED

TWO WAYS TO DEPLOY MB GetID

Turnkey combines software, hardware, deployment, and support in one ready-to-run solution with one responsible partner. Tailored solutions let you choose the software level, deployment model, and devices based on your needs. Both options are ICAO/ISO-aligned, support cloud or on-premise infrastructure, use secure APIs, and include audit and reporting.

TURNKEY SOLUTION

ONE ACCOUNTABLE PARTNER,
START TO FINISH

Complete solution combining software, hardware, deployment, and support in one package – from enrollment setup to operational rollout. Complete solution combining software, hardware, deployment, and support in one package – from enrollment setup to operational rollout.

IDEAL FOR

- Organizations without dedicated technical teams
- Fast, predictable rollout timelines
- Programs requiring one accountable partner

BUILD YOUR OWN TAILORED SOLUTION

CONFIGURE THE SETUP
THAT FITS YOUR PROJECT

Select the software level, operating mode, deployment and integrations that match your requirements – giving you precise control over scope without compromising security or compliance.

IDEAL FOR

- Existing infrastructure environments
- Defined technical and operational scope
- Programs requiring flexible configuration
